<https://www.deannesmeaton.co.nz/>

Senior Full-Stack Engineer and Technical Lead with 12 years of experience developing secure, reliable and performant full-stack solutions. Experience across the .NET ecosystem, with hands-on experience in C#, TypeScript, PostgreSQL and DevOps technologies including Docker, Kubernetes and CI/CD. Experienced in technical leadership, mentoring developers and solving practical problems across software and infrastructure, with a strong focus on building solutions that fit both technical and customer needs.

Experience

Stanbury Electrical Engineering

Software Technical Lead

FEB 2024 – Present

Promoted: Software Developer → Software Technical Lead · Aug 2025

Technical Lead providing technical direction, hands-on development and delivery support across the company's software solutions. Primarily focused on RTPI, an edge and cloud platform for managing material handling equipment (MHE) and electric vehicle charger loads, while also providing technical guidance and development support across internal applications.

Key responsibilities:

- Provide technical direction and design system architecture
- Remain hands-on with full-stack development and integrations
- Coordinate project delivery and enable the development team through Jira
- Manage DevOps, deployments and infrastructure using Bitbucket CI/CD, AWS, Docker, Helm and Ansible
- Administer and support Linux-based offline systems
- Conduct code reviews, mentor developers and provide technical guidance
- Maintain and improve internal .NET, Python and Google Apps Script solutions
- Work with stakeholders to understand requirements and develop practical technical solutions

Key Projects

RTPI: Technical lead for an edge and cloud platform managing MHE and EV charger loads, including architecture, full-stack development, OCPP/Modbus integrations, AWS/Kubernetes infrastructure and offline edge deployments.

Odoo migration: Supported migration from Odoo 16 to Odoo 19, including custom module development, manual migration tasks and Odoo.sh configuration.

Developers Institute

JAN 2022 – SEP 2023

Senior Full Stack and Tech Lead

Mentored and trained software developers across full-stack development and application security, combining technical teaching with hands-on mentoring and code review.

- Delivered training across the MERN and PERN stacks, including React, Express, Node.js, PostgreSQL and MongoDB
- Taught REST API development, authentication, testing, Docker and cloud deployment
- Delivered application security training based on the OWASP Top 10 and secure software development practices
- Created course content, workshops and practical exercises
- Provided 1:1 mentoring, technical feedback and code reviews
- Assessed learner projects and contributed to continuous improvement of the learner experience

Promotions: Associate → Web & Mobile Developer (Sep 2016) → Senior Software Developer (Dec 2017)

Developed and supported websites and business solutions across Auckland Council, with a focus on security, performance, maintainability and customer needs. Promoted to Senior Software Developer within two years, taking on increased responsibility for technical delivery and project leadership.

Key Projects

Rates Guide — Lead Developer / Solution Designer

Designed and developed a reusable solution helping ratepayers understand the potential impact of proposed rates changes. Designed the SQL Server database, ASP.NET Web API and SharePoint front end.

Progress Auckland — Developer

Developed a public website for planned and current construction projects, integrating GIS and spatial data using Umbraco, ASP.NET MVC, Angular, JavaScript, Google Maps and ArcGIS APIs. Implemented Azure DevOps CI/CD and Azure Web Apps.

Customer Service Kiosk — Lead Developer

Designed and developed a kiosk solution for Council Customer Service Centres, including an Umbraco administration portal, UWP application, ASP.NET Web API and Azure services.

Other projects: Engagement Calendar (React, TypeScript, SPFx), DevSec Initiative, Auckland Libraries Website Upgrade, Dare to Explore, City Centre Master Plan and Pest Search.

Two-year graduate programme rotating through Web & Mobile Development, Database Administration, Service Desk, Project Management and Solution Architecture. Contributed to support and project delivery across Information Services.

Other experience

Kids Church Coordinator

2026

Ashburton GVK

Volunteer coordination role involving planning, family communication, and supporting and coordinating volunteers.

Prayer App

2022

Church Unlimited

Volunteered my time to work with the front-end developers from Wove Design to create a function for Google Firebase in Node.js, which sends a reminder email for when the users booking is coming up.

Contract: API Email Service

2021

Wove Designs

Created an API Email Service that connected at checkout to give the front-end developer a better solution when connecting to SendGrid, created the solution using an AWS lambda function in .NET Core.

Skills

Leadership & Delivery

- Technical leadership, mentoring and guidance
- Project planning, coordination and delivery
- Requirements analysis and understanding user needs
- User story development and acceptance criteria
- Software development lifecycle (SDLC)
- Release and deployment management
- Agile development practices
- DevOps and DevSecOps practices
- Secure software development and OWASP principles
- Technical documentation and communication
- Planning, organisation and prioritisation
- Cross-functional collaboration

Technical Skills

- **Languages:** C#, TypeScript, JavaScript, SQL
- **.NET:** .NET, ASP.NET Core, Blazor, MVC, EF Core
- **Web & APIs:** REST APIs, web services, React, Node.js / Express, HTML/CSS
- **Testing:** NUnit, Jest, Cypress
- **Databases:** PostgreSQL, database design and management
- **Cloud:** AWS, Azure
- **Containers & Infrastructure:** Docker, Kubernetes / k3s, Linux
- **DevOps & CI/CD:** GitHub, Bitbucket, Azure DevOps, CI/CD pipelines, Helm, Ansible
- **Messaging & Caching:** RabbitMQ, Redis
- **Edge & Industrial Integration:** Edge computing, OCPP, Modbus
- **Networking:** WireGuard, distributed systems
- **Architecture:** Solution design, distributed applications, integration design, system architecture

Education

2013

Bachelor of Information and Computer Science | Software Developer Major/AUT

Certificates

2026

Leadership And Management Course Part 1

2020

Azure Fundamentals

2019

DevOps Foundation

2019

ICAgile Certified Professionals
